

SUBJECT: Product Safety Policy

Emer, a leading fuel system provider in the compressed natural gas (CNG) and liquefied petroleum gas (LPG) industry, intends to improve steadily the quality of products and services offered to customers, acting in the interests of environmental protection, pollution prevention and continuous improvement, through the implementation of an integrated management system according to Technical Specification IATF 16949:2016 and UNI EN ISO 14001:2015, and with the scope of "design, develop, manufacture and sell valves and alternative fuel systems for vehicles, with particular focus to the OEM market; control of suppliers and activities outsourced; management of customer relations; management of internal staff with particular reference to training.

The primary objective is to develop products that assist in preventing accidents from occurring or, in the event an accident does occur, to minimize the consequences for the drivers and others on the road. The safety management program covers the product quality related to safety, suppliers' and Emer management systems.

The definition of safety not only includes the safety of the immediate user of our products, but also understanding the entire scope of potential impact of our products on society.

From this point of view, Emer sets the following objectives:

- Maintain the leadership of the High Pressure components and systems for CNG and LPG fuels, at the same time encouraging the synergy with other groups in Westport Fuel Systems, with special focus on Product Safety.
- Implement and monitor the deployment of this policy internally and to sub-suppliers.
- Strive to achieve zero accidents with Emer products through the design and manufacturing of high quality products and cooperation with our customers for the correct application.

The Top Management promotes the implementation of this Safety, Environmental and Quality Policy through quantified goals, identification of resources and methods which are necessary to reach them in the defined time frame and it is committed to improve its Management System with the aim to improve its Product Quality. Periodically the state of application of the present Product Safety Policy is verified and revised during the Management's review.
